

Reading questions for “Contaminated Fish”
New York Times, Sunday, June 13, 1971

1. What is unique about the fish that were caught in Foundry Cove?
2. How did the levels of cadmium in the fish compare to normal, or “background” levels?
3. What are some of the consequences of high cadmium levels in humans?
4. According to this article, what is the federal tolerance level for cadmium in fish?
