

CREATIVELY ENGAGING STUDENTS IN LOCAL CLIMATE SCIENCE: HUDSON DATA JAM

Ashley Alred
Education Program Leader
October 19, 2021

Hi there! Meet Ashley...

Now let's meet you!

Please type into the chat...

1. Your name
2. Location
3. Grade/age of the learners you work with
4. Your favorite type of graph

CURRENT SCIENCE AT CARY INSTITUTE

Ecosystem Health

Air pollutants -
acid rain, ozone & mercury

Climate Change
Monitoring

Pharmaceuticals
in streams

Urban
sustainability
& resiliency

Education
research

CURRENT SCIENCE AT CARY INSTITUTE

Ecology of infectious disease

West Nile Virus

Urban ecosystems

Lyme disease

Forests

Invasive Species

Zebra mussels

Phragmites

Water chestnut

What will we do today?

By the end of this webinar, we will know/be able to...

- Brainstorm the types of data we need to explore an Essential Question about climate change.
- Identify datasets within Hudson Data Jam that we can apply to EQ.
- Understand how to use the Hudson Data Jam resources and get involved.
- View fun sample projects!

Now let's explore our long term datasets with an essential question...

THE ESSENTIAL QUESTION

Is climate change happening in the Hudson Valley?

Photo: Creative Commons

A CHALLENGE FOR YOU...

What DATA would help us answer our EQ?

“Is climate change happening in the Hudson Valley?”

[Click here to view the Jamboard. Also viewable on next slide.](#)

What DATA would help us answer this question:

Precipitation and temperature levels by year
-Lauren

Frequency of major storm events

Water levels in the rivers
-Lauren

Reservoir water levels

CO2 in the atmosphere over time - Audrey

Is climate change happening in the Hudson Valley?

Biodiversity lost

Long term data over many years- Jane

Tree bud burst and leaf drop dates- Jane

Species found in the river
-Lauren

SEA LEVEL RISE AT BATTERY PARK, NYC (1856-2014)

Data c/o NOAA; Image: Wikipedia.org

DATE SPRING MIGRANT AMERICAN WOODCOCKS WERE FIRST SEEN IN DUTCHESS COUNTY (1887-2008)

FIRST DAY OF FROST AT CARY ENVIRO MONITORING STATION (MILLBROOK, NY)

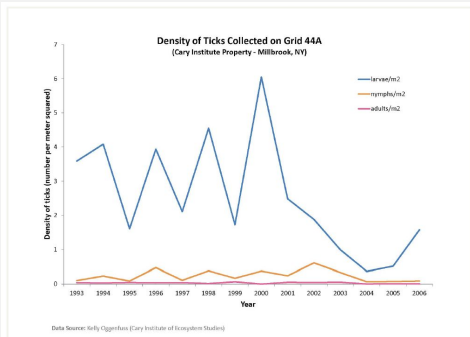

HOW CAN WE HELP STUDENTS UNDERSTAND & AFFIRM THE VALIDITY OF CLIMATE CHANGE?

- 1. Immerse them in authentic **LOCAL** data that connects to their lives.
- 2. Help them find their **VOICE** for communicating their findings.

HOW DOES CARY INSTITUTE HELP STUDENTS THINK ABOUT LOCAL DATA IN A SCIENTIFIC (AND **FUN**) WAY?

SHARING REAL SCIENCE STORIES THROUGH ART

CONTEST ESSENTIALS

1. Download Local Data:

DATA
Lyme Disease
Prevalence in the
Northeast

2. Graph & Report:

CONTEST ESSENTIALS

3. Communicate

4. Compete & Share (Visit our [Project Gallery!](#))

It's all about getting kids **EXCITED** about **uncovering mysteries + increasing understanding** of the Hudson Valley ecosystem, **empowering** them to use data, & **sharing** what they discover with others!

BIRD MIGRATION VIDEO FROM HS STUDENTS WITH THE ART EFFECT

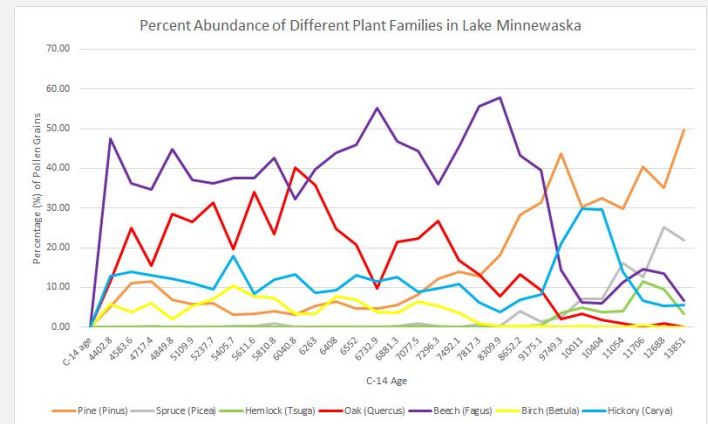

BIRD MIGRATION CHILDREN'S STORY BOOKS

SEA LEVEL RISE VIA BATHING SUIT FASHION TRENDS

PALEOCLIMATE COMIC BOOK

PCBs in Hudson River Fish: Interpretive Dance

DATA JAM: INTENDED STUDENT OUTCOMES

Knowledge:

- Science involved with their projects - concepts & practices
- Hudson watershed
- Underlying ideas about data
- Availability of data about their local environment
- Scientist role models
- Study design

DATA JAM: INTENDED STUDENT OUTCOMES

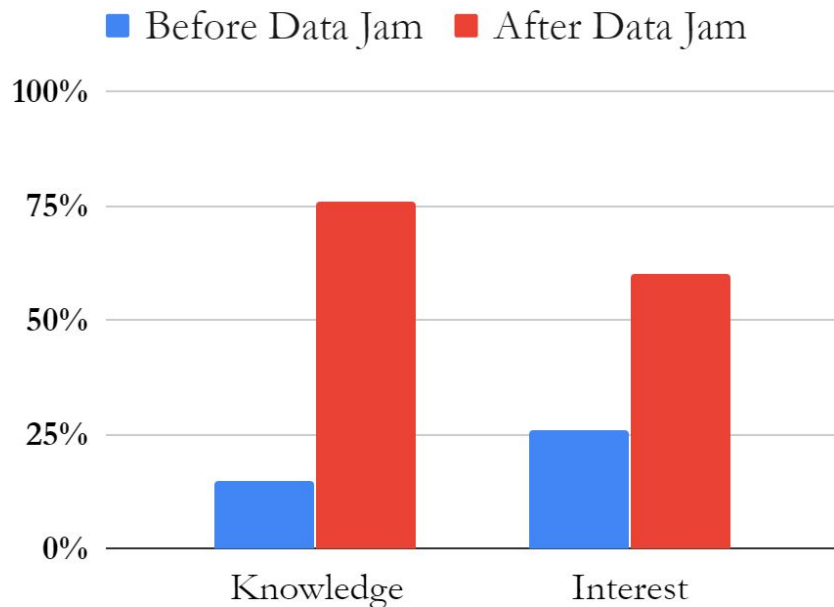

- Skills/practices
 - Data literacy
 - Examples: Manipulating, summarizing, analyzing, representing, making evidence-based claims
 - Creative expression
 - Science communication: combining data with creativity

DATA JAM: INTENDED STUDENT OUTCOMES

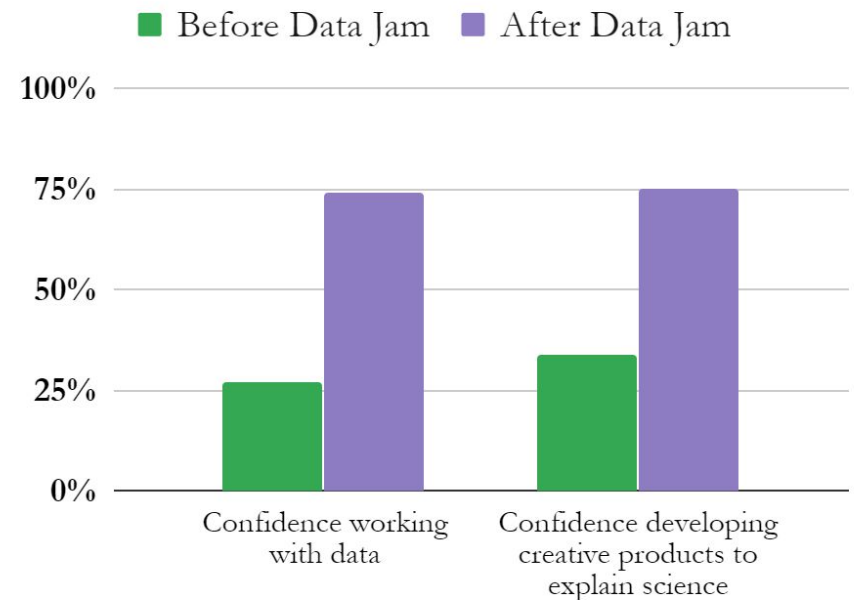

- Affective/feelings
 - Interest (motivation/confidence) in...
 - Data exploration
 - Creative expression
 - Combining the two
 - Identity as a data/science person

RESULTS FROM 2018 DATA JAM STUDENT SURVEYS IN NM, NY, MD, PR (N=160)

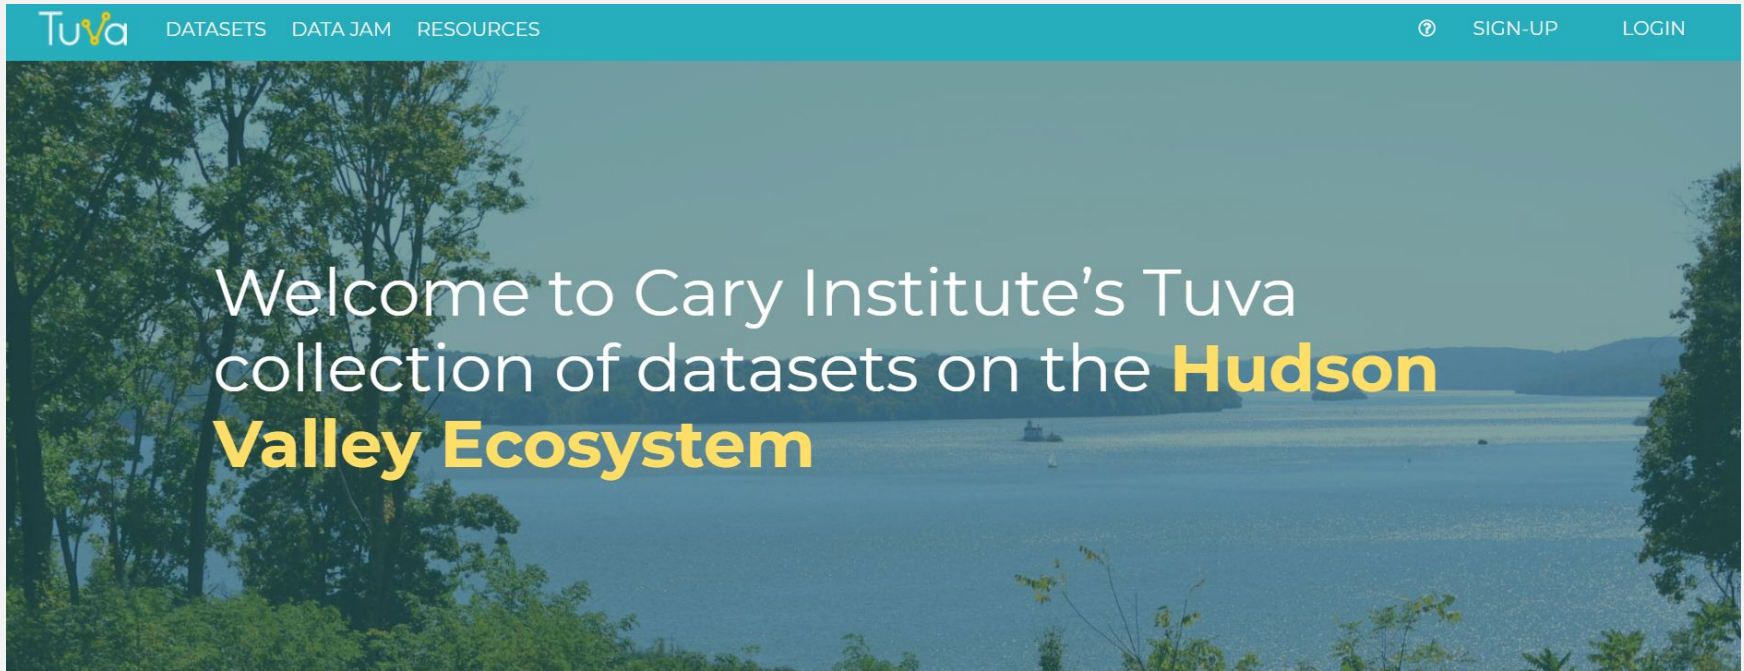

Students reporting high or very high knowledge & interest in the local environment

Students reporting high or very high confidence with data and creative products

“I WANT TO USE LOCAL CLIMATE DATA WITH MY STUDENTS, BUT CAN’T COMMIT TO A LONG-TERM PROJECT LIKE DATA JAM...”

The image shows a screenshot of the Tuva website. The top navigation bar is teal and contains the Tuva logo on the left, followed by the menu items 'DATASETS', 'DATA JAM', and 'RESOURCES'. On the right side of the navigation bar are icons for a search function, 'SIGN-UP', and 'LOGIN'. Below the navigation bar is a large banner image of a lake surrounded by green trees. Overlaid on this image is the text: 'Welcome to Cary Institute’s Tuva collection of datasets on the **Hudson Valley Ecosystem**'. The words 'Hudson Valley Ecosystem' are in a bold, yellow font, while the rest of the text is in white.

HOW YOU CAN BE A PART OF

Any time!	Check out the DJ Website (www.caryinstitute.org/data-jam)
October 22	2022 Program Launch!
November 12	Pre-registration deadline
February 22	Registration deadline
March 8	Projects Due
March 31	Virtual Awards Ceremony & Celebration

Recorded Data Jam Webinars (including this one!):
<https://www.caryinstitute.org/eco-inquiry/workshops-webinars>

Breakout Groups

What kinds of ideas sparked in your mind of how your students can work with data related to climate change and/or the local environment?

Thank You!
