Ultimate Greening Solution

1. What are the major problems that are facing your town?

2. What are the major problems that are facing the entire county?

3. Brainstorm at least three potential solutions that could benefit the entire county.

Solution	How this would benefit air quality	How this would benefit water quality	How this would benefit biodiversity

4. Research these solutions and then select which option improves the ecosystem of the entire county. Explain which solution you believe is the best, using evidence to support your answer.

5. Develop a presentation for your class to highlight your solution. Be sure to include the following points:
   a. How feasible, or practical, is your solution? Make sure you convince the rest of the class that your solution is actually doable, using examples and evidence.
   b. How will your solution impact the ecosystem?
   c. How will your solution impact human health?
   d. Provide at least three sources of evidence to support your argument.
   e. All group members should participate in the presentation.
